PARAS KUMAR

Mobile: +91-8233527893 | Email: paraskumar19025@gmail.com | LinkedIn | GitHub | Portfolio |Jaipur, Rajasthan

PROFESSIONAL SUMMARY

Aspiring Full-stack developer skilled in MERN stack and backend development with strong fundamentals in Java, DSA, and OOP. Experienced in building secure, scalable, and user-focused applications including authentication systems, admin dashboards, and API-driven web solutions. Passionate about problem-solving, improving performance, and contributing to real-world engineering projects.

TECHNICAL SKILLS

- Languages: Java, JavaScript, TypeScript
- Web Development: React.js, Next.js, Angular, Redux, Node.js, Express.js, Zustand
- Databases: MongoDB, SQL, Redis
- Technologies: React Query, GraphQL, Apache Kafka, REST APIs, Microservices ,
- Cloud & Tools: Google Cloud Platform (GCP), Git, GitHub, Vercel, Render, Jira

WORK EXPERIENCE

Softsensor.ai — MERN Stack Developer Intern Jan 2025 – Apr 2025

- Developed and enhanced full-stack features using React.js, Redux, Node.js, and Express.js, including API integration and new feature implementation
- Built and optimized REST & GraphQL APIs with efficient data fetching using React Query, improving performance and scalability
- Refactored existing codebase to improve maintainability, readability, and overall system design
- Designed backend logic and wrote optimized SQL queries for efficient data handling
- Fixed UI and backend bugs and collaborated with senior developers on production-level features and API optimization

PROJECT EXPERIENCE

- E-Commerce Website | Full-Stack Development Project November 2024
  - Designed and built a scalable e-commerce platform using MERN stack (MongoDB, Express.js, React.js, Node.js)
  - Implemented OTP-based email authentication using NodeMailer, reducing fake/duplicate signups by **30%**
  - Integrated dynamic cart functionality, and admin panel for boosting management efficiency by **50%.**
- AI Assistant **|** Full-Stack Development Project August 2025
  - Implemented authentication and history tracking for personalized usage, increasing user retention by **35%**
  - Integrated Ollama as the core AI engine to handle natural language tasks like opening web site's, executing custom commands, playing music, generating code, and more
  - Built a responsive AI assistant with React.js frontend, JWT-secured Express.js backend

EDUCATION

- B-Tech |JECRC University, Jaipur, Rajasthan |CGPA: 8 2022 – 2026
- Secondary Education **|** 73% 2020
- Senior Secondary Education **|** 80% 2022

ACHIEVEMENTS & CERTIFICATIONS

- Web Development Bootcamp – Certified by Springboard 2024
- Achieved a Top 5 Code-A-Thon Coding Competition – JECRC University Jaipur 2025
- Coding :300+ coding questions on leetcode and hackerRank
- Leadership: Commanded school's March-Past team, winning 4 inter-school competitions 2017 – 2019
